☐ Please check if any of the above information has changed since previous year.

II. MINING AND RECLAMATION

1. Was the mine active during the past year? Yes ☒ No ☐
2. If active, how much ore or mineral was mined? 570,973 Tons

3. Briefly describe any new or additional surface disturbances that occurred during the past year. This description should include the type of work performed, volume of material moved, and the acreage affected.

We have no new surface disturbance to report. All mining was done within confines of previously established boundaries.

4. Briefly describe the reclamation work performed during the past year. This description should include acreage reclaimed, methods employed, and an evaluation of the results.

None.

5. What was the total unreclaimed acreage at years end? 127 Acres

6. Briefly summarize mining and reclamation planned for the upcoming year.
Mining will continue as in years past with more material being taken from the higher elevation benches due to the completion of our pioneer road to the 6200 ft. elevation. Slope stabilization benches are being cut as described in the mining plan.

NOTE: Section III., "Additional Information" applies only to large mining operations.

III. ADDITIONAL INFORMATION

1. An updated surface facilities map should be attached if there have been significant changes since the previous map was submitted.
2. No significant changes in disturbed areas have been effected.
Any monitoring results or other reports that are required under the terms of the approved notice of intention should also be attached.
